Executive Summary

- Software Engineering Honours student at The University of Queensland with experience in cloud-native software development, requirements engineering, and human-centred design
- Particular interests in AI-enabled digital transformation, enterprise systems, business analysis, and the application of Interaction Design methods to Requirements Engineering
- Seeking graduate opportunities in technology consulting, product management, business analysis, and enterprise digital transformation

Education

University of Queensland

Bachelor of Engineering (Honours), Software Engineering

Brisbane, Australia

Feb 2023 – Nov 2026 (Expected)

Academic Focus

- Requirements Engineering and Human-Centred Design
- Enterprise Information Systems and Digital Transformation
- Software Architecture and System Design
- Human-Computer Interaction (HCI)
- User Journey Mapping and Interaction Design
- Cloud-native Software Development

Relevant Coursework by Domain

- **Software Engineering & Development:** Programming in the Large (CSSE2002), The Software Process (CSSE3012), Functional and Logic Programming (COMP3400)
- **Software Architecture & Computer Systems:** Introduction to Computer Systems (CSSE2010), Computer Systems Principles and Programming (CSSE2310), Software Engineering Studio: Design, Implement and Test (CSSE3200), Algorithms and Data Structures (COMP3506), Software Architecture (CSSE6400)
- **Human-Centred Design & Interaction Design:** Human-Computer Interaction (DECO2500), Design Computing Studio (Proposal & Build) (DECO3800, DECO3801)
- **Enterprise & Information Systems:** Introduction to Information Systems (INFS1200), Relational Database Systems (INFS2200), Web Information Systems (INFS3202)
- **Business, Research & Professional Practice:** Professional Practice and the Business Environment (ENGG4902), Research and Development Methods and Practice (REIT4841)
- **Machine Learning & Quantitative Foundations:** Machine Learning (COMP4702), Discrete Mathematics (MATH1061), Probability and Statistics for Engineering (STAT2203)

Experience

Full-stack Intern

Cyberlark

Aug 2025 – Present

Brisbane, Australia

- Developed full-stack features for a real estate CRM platform using AWS and React
- Built and maintained a DynamoDB-backed Trello-style board with drag-and-drop card ordering
- Implemented a GSI (Global Secondary Index) for native DynamoDB sorting
- Collaborated with a lead developer in an agile environment using Git and code reviews

Front-end Intern

Moustache Republic

Jan 2025 – Feb 2025

Auckland, New Zealand

- Used the React framework to develop web applications, focusing on component-based UI development
- Developed components using JSX and Tailwind CSS

Front-end Intern

10thDan

Jun 2024 – Jul 2024

Remote (Company in Melbourne)

- Used the Angular framework to develop front-end features

Mentoring

University of Queensland

Jul 2023 – Nov 2023

Brisbane, Australia

- Offered academic and career guidance to first-year Engineering, Architecture and Information Technology students

Projects

Honours Thesis – Human-Centred Requirements Engineering & Interaction Design (In Progress)

- Investigating how Interaction Design (IxD) methods can be integrated into Requirements Engineering (RE) to better capture end-user needs in enterprise environments
- Developing a framework that bridges Human-Centred Design, Requirements Engineering, and Enterprise Systems practice
- Translating stakeholder needs, user journeys, and contextual insights into formal system specifications and requirements artefacts
- Conducting empirical research with industry practitioners to evaluate IxD-informed RE outcomes

TrainForge – Django SaaS Platform

- Built a full-stack SaaS platform for personal trainers using Django, Bootstrap 5, and MySQL
- Implemented client management, appointment scheduling with a calendar, and personalised training programs
- Deployed to cloud infrastructure with Nginx and Gunicorn
- Integrated role-based authentication and admin subscription management

Clash of Clankers – Game

- Contributed to a 42-member development team building a game using Java and LibGDX
- Developed HUD elements including dynamic health display and interface screens
- Collaborated using Git within a large-scale version control workflow

EcoCache – Web Application

- Collaborated in a six-person team to develop a gamified platform promoting interaction with nature
- Developed dynamic front-end components using React and JSX
- Contributed to UI responsiveness and component-based architecture

Skills

Technical Skills: Python, Java, C, HTML/CSS, JavaScript, SQL, Amazon Web Services (AWS), React, Git, Django, Bootstrap 5, MySQL, DynamoDB, Nginx, Gunicorn, LibGDX

Consulting & Analysis Skills: Requirements Engineering, Stakeholder Analysis, Human-Centred Design, Interaction Design, User Journey Mapping, Business Process Analysis, Enterprise Systems, Software Architecture, Digital Transformation, Agile Delivery

Languages: English (Native), Mandarin (Conversational), Cantonese (Conversational)

Activities & Interests

Competitive Swimming: Gold & Silver medallist, 2020 Anthony Mosse Classic NZ; Competed at NZ Secondary Schools Championships (2019); regular club competitor (Swimming Auckland, Level 1) until 2020

Swim Instruction: Casual swim teacher; coached beginner swimmers in stroke technique and water safety

Investing / Stock Research: Personal equity research with a focus on AI infrastructure and emerging tech
