## Experience

---

### Full-stack Intern

Aug. 2025 – Present

Cyberlark

Brisbane, Australia

- Developed full-stack features for a real estate CRM platform using AWS and React
- Built and maintained DynamoDB-backed Trello-style board with drag-and-drop card ordering
- Implemented GSI (Global Secondary Index) for native DynamoDB sorting
- Collaborated with a lead developer in an agile environment using Git and code reviews

### Front-end Intern

Jan. 2025 – Feb 2025

Moustache Republic

Auckland, New Zealand

- Used React Framework to develop web applications, focusing on component based UI development
- Developed components using JSX and Tailwind CSS

### Front-end Intern

June. 2024 – July 2024

10thDan

Remote (Company in Melbourne)

- Used Angular Framework to develop front-end features

### Mentoring

July 2023 – Nov 2023

University of Queensland

Brisbane, Australia

- Offered academic and career guidance to first-year EAIT students

## Projects

---

### Honours Thesis - Requirements Engineering meets Interaction Design (In Progress)

- Investigating how Interaction Design methods can be integrated into Requirements Engineering to better capture end-user needs in enterprise environments
- Applying Human-Centred Computing methods to identify gaps between stakeholder and design practices
- Conducting empirical research with industry practitioners

### Trainforge - Django SaaS Platform

- Built a full-stack SaaS platform for personal trainers using Django, Bootstrap 5, and MySQL
- Implemented client management, appointment scheduling with a calendar, and personalised training programs
- Deployed to cloud infrastructure with Nginx and Gunicorn
- Integrated role-based authentication and admin subscription management

### Clash of Clankers - Game

- Contributed in a 42 member development team building a game using Java and LibGDX
- Developed HUD elements including dynamic health display and interface screens
- Collaborated using Git within a large-scale version control workflow

### EcoCache - Web application

- Collaborated in a six-person team to develop a gamified platform promoting interaction with nature
- Developed dynamic front-end components using React and JSX
- Contributed to UI responsiveness and component-based architecture

## Skills

---

**Software Languages and technologies:** Python, Java, C, HTML/CSS, JavaScript, SQL, Amazon Web Services (AWS), React, Git, LibGDX, Django, Bootstrap 5, MySQL, Nginx, Gunicorn, Human Computer Interaction, Requirements Engineering, Interaction Design

**Spoken Languages:** English, Mandarin, Cantonese

## Education

---

### University of Queensland

Brisbane, Australia

Bachelor of Engineering (Honours), Software Engineering

Feb 2023 – Nov 2026 (Expected)
